

Cumulative Number of Persons Living with HIV/AIDS by Public Health Regions  
Tennessee through December 31, 2004  
Statewide Totals = 13,679

Any county reporting five (5) or more resident cases are indicated. No individual county information will be released for counties reporting 0-4 cases (denoted by an " \* "). All figures include only Tennessee resident cases (by current county of residence) and do not include residents from other states. When the current county of residence was unknown, the county of diagnosis was substituted. A total of 1,242 persons living with AIDS "only" from other states are receiving testing, diagnostic procedures and/or treated in a Tennessee facility. State law T.C.A. 68-10-101 requires every physician or other person who diagnoses, treats or prescribes for a case of HIV or AIDS infection be reported to the Tennessee Department of Health. All persons initially diagnosed with HIV or AIDS on or after January 1, 1992 must be reported. For further information, contact the following individuals:
